

8th ETAEc Conference, Special Edition of 2022: Emerging Trends and Approaches in Knowledge based Economy: Creative Thinking and Innovation in Multi-crisis Environment - Call for Sustainability

**Faculty of Economics and Law
University of Pitești, Romania**

For consumers around the world, the last few years have been an unwanted rollercoaster ride. When the COVID-19 pandemic first emerged, people put their health first, adopting very different behaviors and attitudes almost literally overnight. As the economic impact of the pandemic took its toll, they shifted their attention to affordability and the cost of living. And when it looked as though the clouds were slowly starting to lift, people started to prioritize a new set of “post-crisis” values, especially around sustainability.
